Summit Trade Pte Ltd is a private export trading company located at Wuzhou city, which was reformed and derived from the Export Sector of former state-run Wuzhou Foreign Economic Relations and Trade Union Corporation in 2006. We are professional on pine chemicals and export to Southeast Asia, Middle East, Europe, USA & Latin America worldwide with a 10,000mt supplying capacity.

With the international business experience for dozen years and advantage of local pine resource, we focus on dozens of pine chemicals such as gum rosin, rosin ester, modified resin, turpentine, pine oil, terpineol, etc. We are one of the companies with most abundant series specialized on rosin, turpentine & intensive processed derivates in China.

Summit™ Products are applicable to paint, ink, adhesive, rubber, paper, printing, daily chemical, medicine, electronics & many other industries and welcomed & purchased widely as important basic raw materials by domestic & overseas routine customers.

Applying ISO9001:2008 quality control management and maintaining a good beneficial associate & agency with qualified regular manufacturers, we respond actively to market changes & challenges and dedicate best services to distinguished customers with reasonable preferential price, reliable excellent quality and timely technical support.

Important Notice:

- The following products data & specification are believed to be accurate and presents with the best description as far as we can. We assume no liability resulting from it. The executable specification will be stipulated & confirmed in the sales contract.
- Product's specification may be adjusted or customized upon customer's particular request.

GUM ROSIN

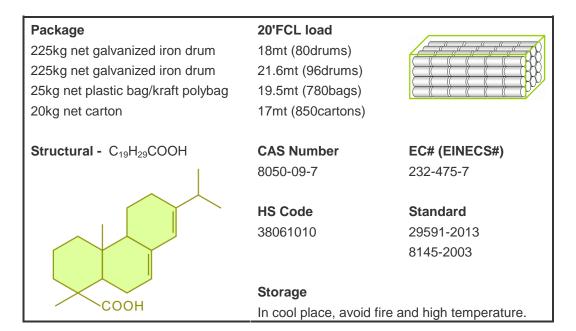

Property & Usage

SumRos™ Gum Rosin is distilled from natural drops of crude gum substance from pine trees including pinus massoniana, kahsya, elliottii, ynensis, latteri, merkusii, etc. It is a kind of natural resin, a mixture of various organic acid with special chemical activity as an important raw material.

Usage in paint, printing ink, soap, rubber, paper, synthetic resin, electronic industry, organic synthesis, etc.

Technical Data Sheet (TDS-1100)

GUM ROSIN	X GRADE	WW GRADE	WG GRADE
Appearance	transparent	transparent	transparent
Color (species color of gum rosin)	slight yellow	light yellow	yellow
Softening point (R&B, deg C)	76.0 min.	76.0 min.	75.0 min.
Acid value (mg/g)	166 min.	166 min.	165 min.
Unsaponifiable matters	5 - 8% max.	5 - 8% max.	5 - 8% max.
Insoluble matter in alcohol	0.030% max.	0.030% max.	0.030% max.
Dirt matters	0.020% max.	0.020% max.	0.030% max.

HYDROGENATED ROSIN

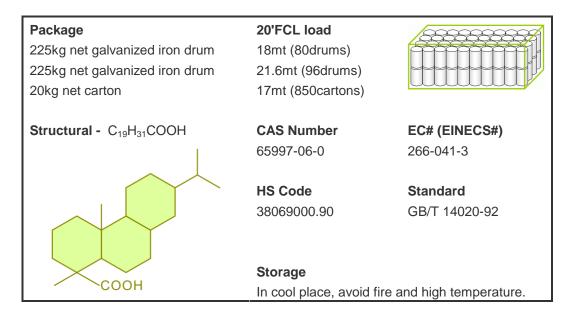

Property & Usage

SumRos™ Hydrogenated Rosin is a low color, thermoplastic resin made from natural gum rosin via refine, hydrogenation or disproportion featured outstanding properties such as low-stable color, oxidation and aging resistance.

Usage in adhesive, synthetic rubber (as emollient and plasticizing agent), paint, ink, pigment, electronics industry(solid & liquid solder flux), paper, soap, etc.

Technical Data Sheet (TDS-1200)

HYDROGENATED ROSIN	НХ	ннх	RHR-1	RHR-3	WWR-1	WWR-3

DISPROPORTIONATED ROSIN

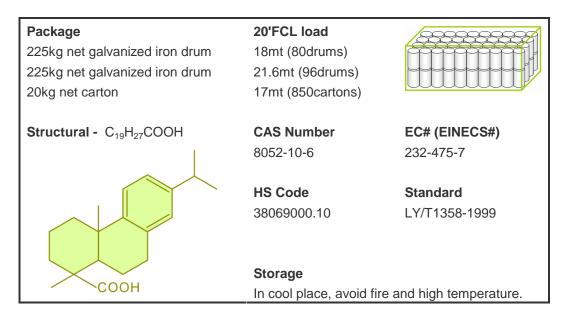

Property & Usage

SumRos™ Disproportionated Rosin is made from gum rosin by isomerizing via a Pd-C catalyst. Mainly dehydroabietic acid element provides superior chemical stability.

Usage in potassium soap, synthetic rubber (SBR, NBR, ABS, etc.), water-solubility PSA, etc.

Technical Data Sheet (TDS-1300)

DISPROPORTIONATED ROSIN	SUPER GRADE	EXPORT GRADE
Appearance	transparent	transparent
Color (refer to gum rosin species)	WW min.	N min.
Softening point (R&B, deg C)	75.0 min.	75.0 min.
Acid value (mgKOH/g)	155 min.	150 min.
Abietic acid	0.1% max.	0.5% max.
Dehydroabietic acid	52% min.	45% min.
Unsaponifiable matter	10% max.	12% max.

POLYMERIZED ROSIN

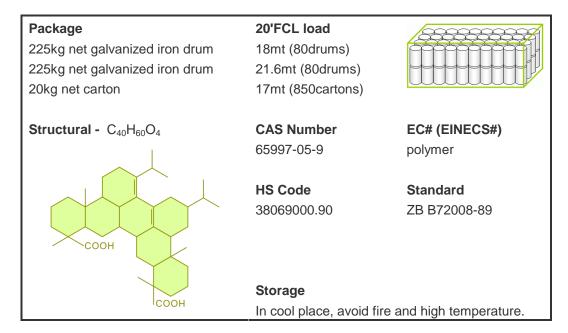

Property & Usage

SumRos[™] Polymerized Rosin is made from gum rosin by polymerization via catalyst. It has many excellent properties including high softening point, anti-oxidation, non-crystallizing and good compatibility with film-forming agent.

Usage in ink, adhesive, paint, varnish, soldering flux, synthetic resin, etc.

Technical Data Sheet (TDS-1400)

POLYMERIZED ROSIN	P140	P115	P95
Appearance	transparent	transparent	transparent
Color (USDA)	WG-M grade	WG-M grade	WG-M grade
Softening point (R&B, deg C)	135 - 145	110 - 120	90 - 100
Acid value (mgKOH/g)	140 min.	145 min.	150 min.

Dissoluble matter in hot water	0.20% max.	0.20% max.	0.20% max.

MALEATED ROSIN

Property & Usage

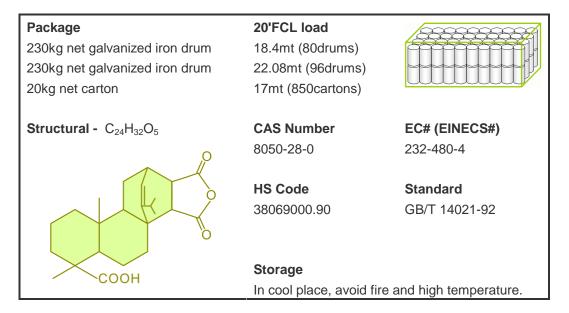

SumRos™ Maleated Rosin is famous for its good color and little impurity. It is used as a raw material for sizing agent in papermaking. Its dosage may be reduced when used as reinforcing sizing agent. Also, it is useful to disperse sizing agent with emulsifiers in order to reduce its dosage and alum, which can reduce the total cost of papermaking.

Usage in gravure printing ink and paper-making.

Technical Data Sheet (TDS-1500)

MALEATED ROSIN	M115	M103
Appearance	transparent	transparent
Color (Gardner)	8 max.	8 max.
Softening point (R&B, deg C)	106 min.	85 min.
Acid value (mgKOH/g)	220 min.	175 min.
Saponification value	280 min.	192 min.

Package & Notes

DISPROPORTIONATED ROSINATE

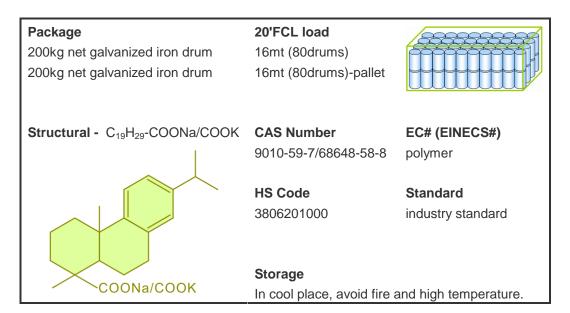

Property & Usage

SumRos[™] Disproportionated Rosinate is obtained by saponification of alkali metals (sodium or potassium) and disproportionated rosin. It's also name as sodium rosinate or potassium rosinate. The product may increase the viscosity & plasticity of synthetic rubber which may improve tensile strength and heat resistance.

Usage as emulsifier for synthetic rubbers (SBR, CR, NBR) and ABS plastics.

Technical Data Sheet (TDS-1600)

DISPROPORTIONATED ROSINATE	SODIUM SOAP	POTASSIUM SOAP
Solid Content	70 +/- 1%	80 +/- 1%
Color (Gardner)	4 max.	4 max.
pH (25 deg C)	9.2 - 10.0	9.2 - 9.8
Salt abietic	0.25% max.	0.25% max.
Salt dehydroabietic	36% min.	43% min.
Chloride (as NaCl/KCl)	0.20% max.	0.20% max.
Unsaponifiable material	8 - 13%	8 - 13%
Acid number (mgKOH/g)	12 +/- 2	12 +/- 2

ESTERIFIED ROSIN

Property & Usage

SumRos™ Esterified Rosin is a kind of partial ester of gum rosin. The high polarity, excellent polymer compatibility and presence of increased levels of rosin acids in this resin make it useful in a wide variety of adhesives. It's soluble in aromatic and aliphatic hydrocarbon solvents, esters, ketones and chlorinated solvents. Insoluble in alcohol and water.

Usage for use in high vinyl acetate EVA hot melt adhesives to impart improved wetting and increased polarity. Its ability to form salts with organic and inorganic bases allows water dispersability. This resin can also be used in construction adhesives, rubber compounding, sealants, coatings and other applications.

Technical Data Sheet (TDS-1700)

ESTERIFIED ROSIN	E95
Appearance	transparent piece or granular
Color (Gardner)	1 - 4
Softening point (R&B, deg C)	90 - 100
Acid value (mgKOH/g)	70 - 150

	Storage In cool place, avoid fire	and high temperature.

REFINED GUM ROSIN

Property & Usage

SumRos™ Refined Gum Rosin is refined from natural gum rosin to decrease the rosin oxidation and has lighter color, better performance and less heavy metal content.

Use in high-quality synthetic resin, paint, coating, printing ink, electronics, organic synthesis, etc.

Technical Data Sheet (TDS-1800)

REFINDED GUM ROSIN	R80
Appearance	slight yellowish solid

GLYCEROL ROSIN ESTER

Property & Usage

SumRez™ Glycerol Rosin Ester is made from gum rosin or refined natural rosin via esterification of glycerol. It features as good stability and anti-aging ability.

Usage in pressure-sensitive adhesive (PSA) and other tackifier and adhesive products.

Technical Data Sheet (TDS-3100)

PENTAERYTHRITOL ROSIN ESTER

Property & Usage

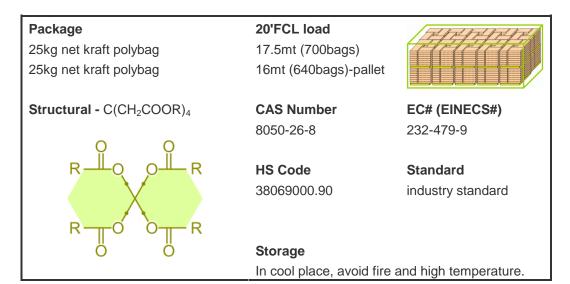

SumRez™ Pentaerythritol Rosin Ester is made from gum rosin or refined natural rosin via esterification of pentaerythritol. It features as good stability and anti-aging ability.

It can greatly improve the adhesion power of EVA gum with good anti-oxidation because of its extremely pale color, low odor and excellent heat stability, Dissolvable in petroleum hydrocarbons, aromatic hydrocarbons, esters, ketones and other solvent. For its excellent compatibility with various kinds of resins, it may be used across the board with NR, CR, SBR, EVA, SIS, SBS and other high polymers.

Usage in hotmelt adhesive (HMA), pressure-sensitive adhesive (PSA) and other tackifier.

Technical Data Sheet (TDS-3200)

PENTAERYTHRITOL ROSIN ESTER	P100	P103
Appearance	transparent granular or piece	transparent granular or piece

MALEIC RESIN

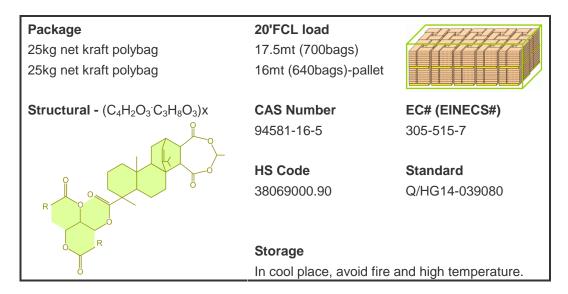

Property & Usage

SumRez[™] Maleic Resin is made from gum rosin and maleic anhydride via esterification with polyhydric alcohol. It is easy compatible with various solvents including coal tar oil, ester, vegetable oil and turpentine oil. Application for surface coatings and primers to improve the gloss, hardness, drying speed, abrasion resistance and yellow resistance.

Usage in polyurethane (PU) paint, acid hardening paint, nitrocellulose (NC) paint, amino backing paint, gravure printing ink, spray & varnish etc.

Technical Data Sheet (TDS-3300)

MALEIC RESIN M130	M130	M140

ROAD-MARKING-PAINT RESIN

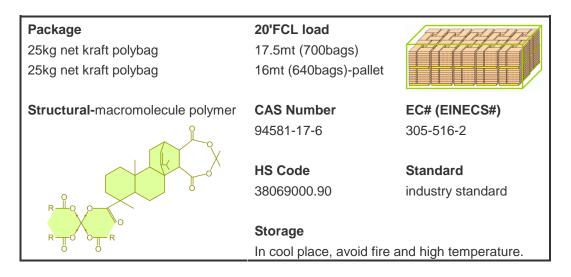

Property & Usage

SumRez™ Road-Marking-Paint Resin is made from gum rosin, high molecular polymer, unsaturated dibasic acid and polyhydric alcohol by condensation and esterification, adding heat-stability agent and light-stability agent. It dissolves in aromatic, aliphatic, ester, and keto solvent.

Usage in road marking paint in traffic facilities. It's specialized for hot-melt road-marker paint and used as interlinking agent. Applying with it, the road-marker paint features anti-pressure, anti-abrasion, anti-pollution, appropriate flowage, fast drying and other good performance. So it can melt and mix with petroleum resin & EVA to make white or yellow road-marker paint.

Technical Data Sheet (TDS-3400)

ROSIN MODIFIED PHENOLIC RESIN

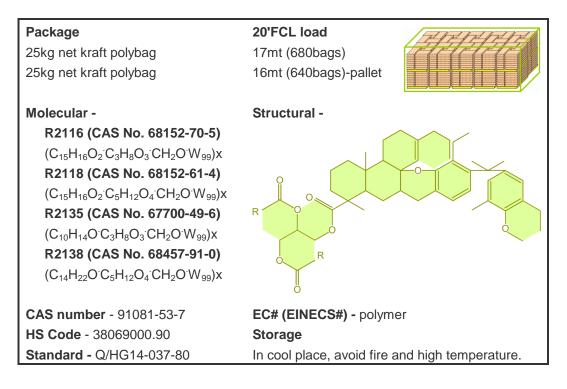

Property & Usage

SumRez[™] Rosin Modified Phenolic Resin is the vacuum treated product of esterification of polyhydric acid with the poly-condensation of rosin, formaldehyde and phenol / bisphenol A / para-tertiary-butyl phenol / para-tertiary-octyl phenol. It dissolves in tar, ester, gum turpentine and similar solvents, partly in petroleum products but not in alcohol solvents. It melts and mixes well with vegetable oils and features high softening point, good hardness, fast drying and high gloss.

Usage in paint, web-offset printing ink and offset printing ink such as paper-roll printing.

Technical Data Sheet (TDS-3500)

ROSIN MODIFIED PHENOLIC RESIN	R2116	R2118	R2135	R2138

TERPENE PHENOLIC RESIN

Property & Usage

SumRez[™] Terpene Phenolic Resin is make from gum turpentine and phenol. It features as high softening point & light color, close distribution of molecular weight, superior tackifying ability & heat-resistance, extensive solvency & good phase with various kinds of elastomer or resin, and a longer period of the tackifying ability at early stage for solvent adhesive.

Usage in chloronorgutta rubber adhesive for PVC artificial leather, dismodule type of CR adhesive, hot-melt adhesive & adhesive tape, and sole adhesive of top grade shoes.

METHYL ROSINATE

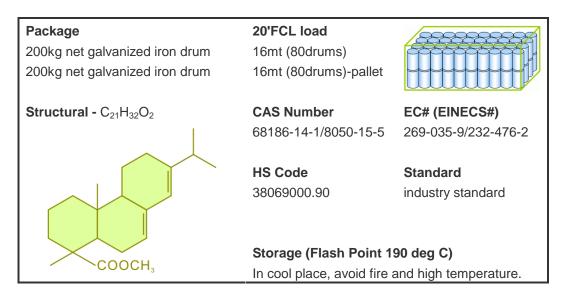

Property & Usage

SumRez™ Methyl Rosinate is made from gum rosin or hydrogenated rosin through esterification with methanol. It has a superior cold resistance ability and may maintain a valid viscosity under -40 deg C circumstance.

Usage in adhesive, solder flux, surface active agent, coatings, etc.

Technical Data Sheet (TDS-3800)

HYDROGENATED ROSIN ESTER

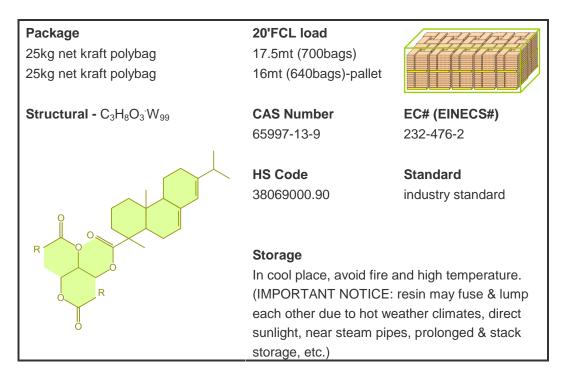

Property & Usage

SumRez[™] Hydrogenated Rosin Ester is the glycerol ester of highly hydrogenated refined gum rosin. It is an exceptionally pale thermoplastic resin that has outstanding resistance to oxidation and to discoloration caused by heat and aging. Used as a tackifier resin in various types of adhesives, and in protective and barrier type coatings that require an exceptional degree of color retention and oxidation resistance.

Usage as tackifier resin in PSA adhesives for tapes, labels, medical appliances, and specialty application and in lamination of metal foil, paper, cloth, cellophane, and cellulose acetate films.

Technical Data Sheet (TDS-3900)

HYDROGENATED ROSIN ESTER	H85	H100
Appearance	granular or piece	granular or piece
Color (Gardner)	3 - 6	3 - 6

ESTER GUM

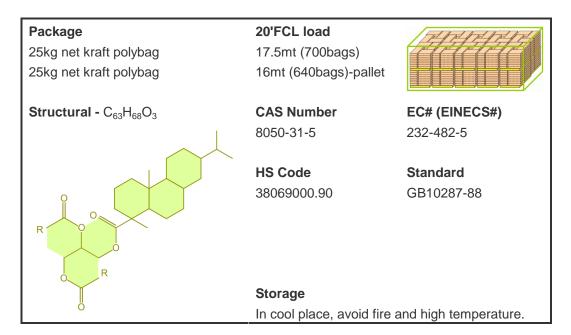

Property & Usage

SumRez™ Ester Gum is made from gum rosin or hydrogenated rosin through esterification with edible/pharmacy grade glycerol. Both are food grade for food additive.

Usage as emulsification stabilizer in drinks and as chewing ingredient in chewing gum & bubble gum. The hydrogenated ester gum can be also used as tackifier for cigarette filter adhesives.

Technical Data Sheet (TDS-4000)

ESTER GUM (FOOD GRADE)	ESTER GRADE	HYDRO GRADE
Color (Gardner)	8 max.	8 max.

GUM TURPENTINE

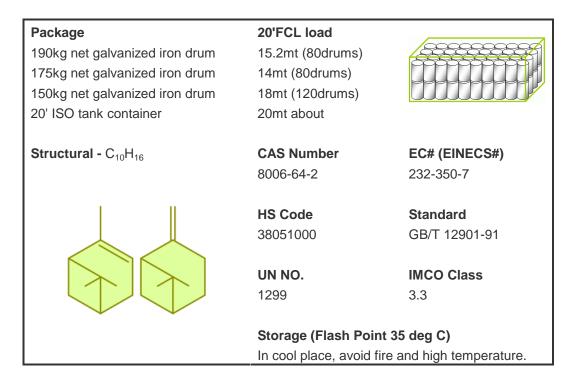

Property & Usage

SumFlu™ Gum Turpentine is distilled and rectified from pine resin, which component is alpha pinene and beta pinene. It is a kind of natural essential oil, a mixture of various terpenoid and hydrocarbon with special chemical activity.

Usage in paint, synthetic camphor, terpineol, synthetic perfume, medicine production, synthetic resin, organic chemical industry, etc.

Technical Data Sheet (TDS-5100)

GUM TURPENTINE	SUPER GRADE
Color & appearance	clean, transparent
Specific gravity (20 / 4 deg C)	0.87 max.
Refractive index (20 deg C)	1.4650 - 1.4740
Initial distilling point (deg C)	150 min.
Distillate (below 170 deg C)	90% min.
Acid value (mgKOH/g)	0.5 max.

DIPENTENE

Property & Usage

SumFlu™ Dipentene is the by-product of gum turpentine intensive processing by isomerization(CT) or hydration(DT) production method. It's also named as p-mentha-1,8-diene, menthadiene, terpodiene, etc.

Usage in rubber, synthetic perfume, daily-chemical detergent, coating paint, etc.

ALPHA PINENE

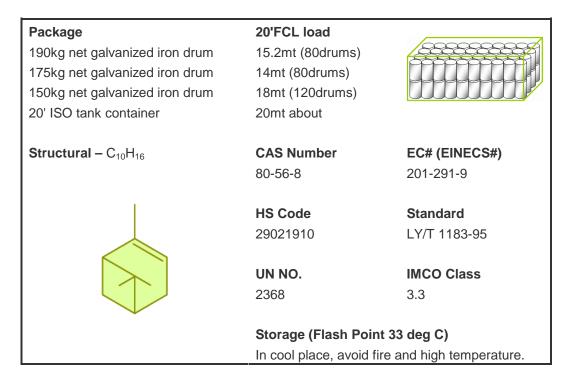

Property & Usage

SumFlu™ Alpha Pinene is obtained from distilling gum turpentine. It has an active property because of its double carbolic key and carbolic ring.

Usage in synthesis camphor, borneol, terpineol and perfume.

Technical Data Sheet (TDS-5310)

ALPHA PINENE	95%
Appearance	clear transparent liquid
Color (Pt-Co method)	35 max.
Specific gravity (d 20/4)	0.855 - 0.865
Refractive index (n 20/D)	1.4640 - 1.4680
Acid value (mgKOH/g)	0.5 max.
Moisture	0.1% max.
Purity (GC analysis)	95% min.

BETA PINENE

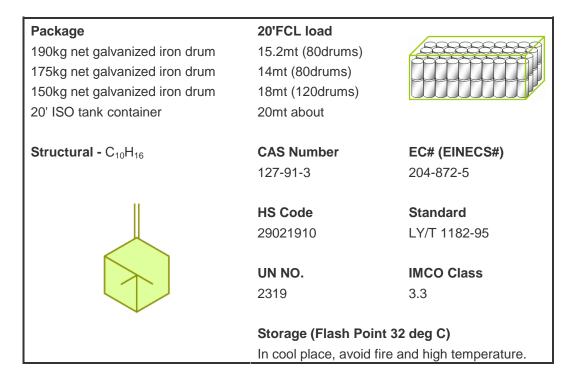

Property & Usage

SumFlu™ Beta Pinene is obtained from distilling gum turpentine. It has an active property because of its double carbolic key and carbolic ring.

Usage in synthesis perfume.

Technical Data Sheet (TDS-5320)

BETA PINENE	95%
Appearance	clear transparent liquid
Color (Pt-Co method)	35 max.
Specific gravity (d 20/4)	0.860 - 0.870
Refractive index (n 20/D)	1.4750 - 1.4820
Acid value (mgKOH/g)	0.5 max.
Moisture	0.1% max.
Purity (GC analysis)	95% min.

PINANE

Property & Usage

SumFlu™ Pinane is obtained by chemical reaction from alpha pinene.

Usage as intermediate for vitamin A, vitamin E, vitamin K production and aromatic chemicals.

Technical Data Sheet (TDS-5400)

PINANE	98%
Appearance	colorless transparent liquid
Purity (GLC)	98% min.
Cis-isomer : tran-isomer	95 : 5 min.
Refractive index (n 20/D)	1.4570 - 1.4670
Specific gravity (d 20/4)	0.849 - 0.959

CAMPHENE

Property & Usage

SumFlu™ Camphene is an isomeric result of pinene, a kind of terpene, appears white wax-like solid in normal temperature. Practically insoluble in water, Moderately soluble in alcohol, soluble in ether, cyclohexane, dioxane, chloroform. It will volatilize when exposed to air.

Usage widely in perfumery and make agriculture chemical and camphor.

Technical Data Sheet (TDS-5500)

CAMPHENE	95%
Appearance	white crystal solid
Content (GC)	95% min.
Freezing point (deg C)	40 min.
*Typical content:	Camphene 80% + Tricyclene 15%

CAMPHOR POWDER

Property & Usage

SumFlu™ Camphor Powder is made from gum turpentine and synthesized by series of chemical reaction and processing. It is a kind of terpene-ketone compound, which chemical name is synthetic camphor-2.

Usage in plastic industry and medicine.

Technical Data Sheet (TDS-5600)

CAMPHOR POWDER	DAB6 GRADE	DAB8 GRADE

BORNEOL

Property & Usage

SumFlu™ Borneol is made from gum turpentine. It is a fragrant colorless transparent or white semi-transparent crisp crystalline schist. It's volatile and dissolves easy in organics solvent such as ethanol, ether, gasoline etc. but not in water.

Usage widely in daily chemical, pharmacy, flavor and perfume.

Technical Data Sheet (TDS-5700)

BORNEOL	55%
Content	55% min.

ISOBORNYL ACETATE

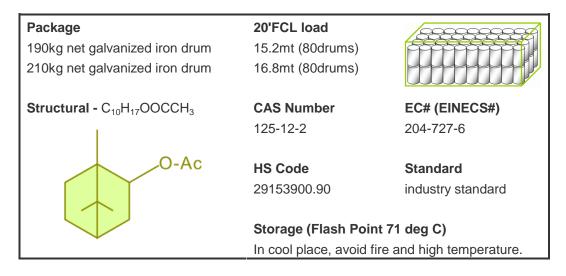

Property & Usage

SumFlu™ Isobornyl Acetate is obtained from turpentine by chemical process such as distillation, isomerization and esterification. It is colorless or slightly yellowish transparent oil-shape liquid, having slight perfume.

Usage as basic materials of camphor, isoborneol and synthetic perfume.

Technical Data Sheet (TDS-5800)

ISOBORNYL ACETATE	95%
Color	colorless or slight-yellowish transparent liquid
Purity	95% min.
Specific gravity (d 20/4 deg C)	0.970 - 0.990
Dioptre (n 20/d)	1.4520 - 1.4680
Free acid (mg/g)	0.5 max.

LINALOOL

Property & Usage

SumFlu[™] Linalool is made from pinene or acetylene via complicate chemical reactions.

Usage widely in perfumery applications including fine cosmetics, food, soaps & detergents and also for making Vitamin E & geraniol.

Technical Data Sheet (TDS-5900)

LINALOOL	95%	98%
Appearance	colorless to slight yellowish clear transparent liquid	colorless to slight yellowish clear transparent liquid

ISOBORNEOL

Property & Usage

SumFlu™ Isoborneol is made from gum turpentine and also named as also named exo-bornel or isocamphol. It is a white crystal substance and has a equivalent character & odor to camphor. It's soluble in ethanol, ether, chloroform, toluene but not in water.

Usage in pharmacy, perfumery industry, daily chemical, etc.

Technical Data Sheet (TDS-6000)

P-MENTHANE

Property & Usage

SumFlu™ *p*-Menthane (*para*-Menthane) is made by hydrogenation from dipentene. It's an intermediate for perfumery and other chemical industry.

Used as the basic material for menthane hydroperoxide, intermediate for fragrance & flavor, catalyst for ABS resin, solvents, etc.

Technical Data Sheet (TDS-6100)

P-CYMENE

Property & Usage

SumFlu™ *p*-Cymene (*para*-Cymene) is made by isomerization from high-quality turpentine or dipentene. It has a particular carrot or lemon-like odor and is soluble in alcohol & ether but not in water.

Usage as important raw material for fragrance, cosmetics, perfumery, detergent, soap, daily chemicals, pesticide, medicine, synthetic material, etc.

Technical Data Sheet (TDS-6200)

P-CYMENE	EXPORT GRADE
Appearance	colorless to yellowish transparent liquid

PINE OIL

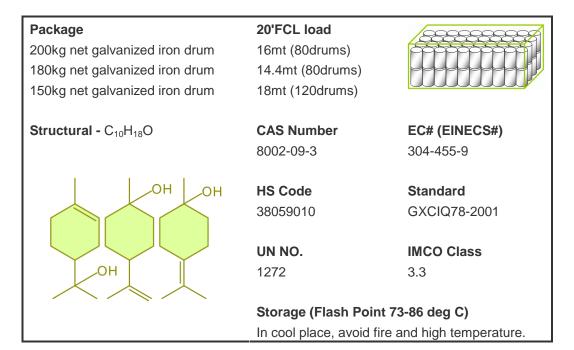

Property & Usage

SumFlu™ Pine Oil is the by-product of producing terpineol from gum turpentine. It has a strong sterilizing effect and superior ability of deodorization, wetness, clearance and penetration.

Usage in daily life washing agent, disinfectant, detergent, metal polishing agent, anti-rust agent, painting solvent and mineral floating agent.

TERPINEOL

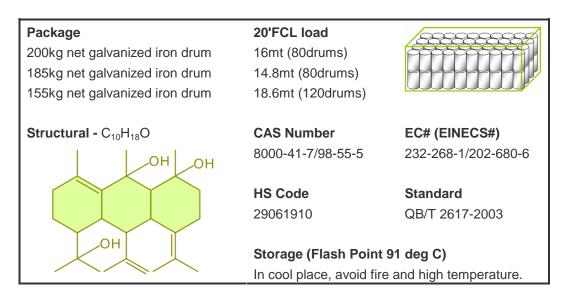

Property & Usage

SumFlu™ Terpineol is made from gum turpentine by hydration reaction via single standard processing or double refined processing method. It is a colorless transparent and thick fluid with pleasant lilac odor.

Usage in cosmetics, essences, soap, daily chemical products, medicine, printing ink, instrument & pigment solvent and other chemical industry widely.

Technical Data Sheet (TDS-7200)

ALPHA TERPINEOL

Property & Usage

SumFlu[™] Alpha terpineol is a kind of terpene alcohol of mixed of isomeric terpineol, obtained by dehydration of terpine hydrate. It is composed predominantly of alpha terpineol, which is the only fragrant substance in the isomers, with lesser amounts of gamma, beta and delta terpineol. At normal temperatures, it is a water white, oily liquid or crystalline with a pleasant floral odor. Its excellent solvency and surface active properties accounts for its usefulness to many fields and industry.

Usage in the manufacturing disinfectants, household and industrial soaps, detergents, cleaners and other chemical specialties.

Technical Data Sheet (TDS-7300)

TERPINYL ACETATE

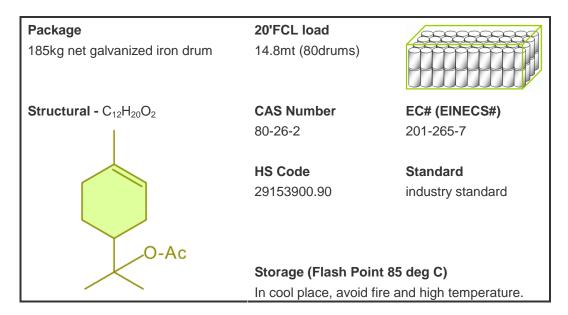

Property & Usage

SumFlu™ Terpinyl Acetate is made from esterification of acetic acid and terpineol together with the oil of vitriol, and with following neutralization, cleanse and rectification. Soluble in oil and alcohol but not in water, is with slight sweet smell like as lavender and chayote.

Usage in concocting lavender, lemon, orange, etc, as indoor aromatic agent or detergent, a substitute of linalool.

Technical Data Sheet (TDS-7600)

TERPINYL ACETATE	95%	98%
Appearance	colorless to slight yellowish clear liquid	colorless to slight yellowish clear liquid

TUNG OIL

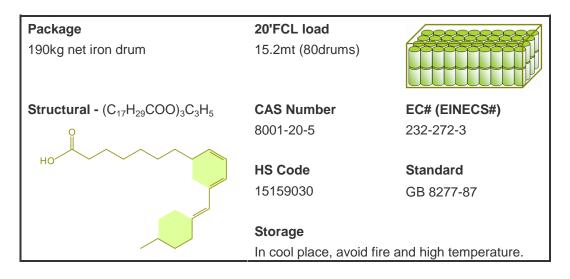

Property & Usage

SumTac[™] Tung Oil is natural plant oil is pressed & extracted from the seeds of tung tree at the oil mill. It consists primarily of the glycerides of the fatty acids linoleic acid and oleic acid. As Chinese traditional export item, it's also named as China wood oil. Tung oil is a kind of superior drying oil and features fast volatility & drying, high gloss, strong adhesion, good resistance to heat, acid, alkali, rot & rust, non-conductive electricity, etc.

Usage as basic important raw material in raw lacquer, varnish, paint, PCB(Printed Circuit Board) & CCL (Copper Clad Laminate), alkyd resin, etc.

TUNG OIL	EXPORT GRADE
Appearance	transparent or slightly turbid
Color	not darker than a freshly prepared solution
	containing 0.4gm potassium dichromate in
	100ml of sulphuric acid (s.g. 1.84).

PHENOL FORMALDEHYDE RESIN

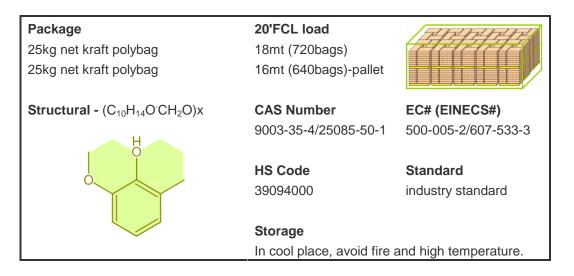

Property & Usage

SumTac[™] Phenol Formaldehyde Resin is irregular transparent solid and soluble in ester, gum turpentine, gasoline solvent, dry oil, etc. It's made from condensation of p-tertiary butyl phenol (p-t-butyl phenol) and formaldehyde under catalysis of calcium hydroxide, also named as Alkyl-Phenol Formaldehyde Resin. Due to its reactive methylol groups, it's most widely used in making polychloroprene contact cements that exhibit long open times and metal coatings. It's soluble in aromatic or aliphatic hydrocarbons, esters, ketones, partially in higher alcohols and completely compatible with nitrile and polychloroprene rubbers. It has a compatibility limit of about 25 in combination with 100 parts by weight of SBR, natural, and reclaimed rubbers.

Usage in high quality paint, coating and adhesive agent & vulcanized agent of rubber products. It's extensively employed in the preparation of general purpose and heat-activating polychloroprene cements. It can also be used in formulating adhesives with NBR, SBR, natural and reclaimed rubbers.

PHENOL FORMALDEHYDE RESIN	F7522
Appearance	clear yellowish solid (irregular pieces/flakes)
Color (Gardner)	4 - 8
Softening point (R&B, deg C)	85 - 115
Hydroxymethylate content	9 - 15%
Free phenol content	1.5% max.
Free aldehyde content	0.5% max.

Technical Data Sheet (TDS-9100)

POLYTERPENE RESIN

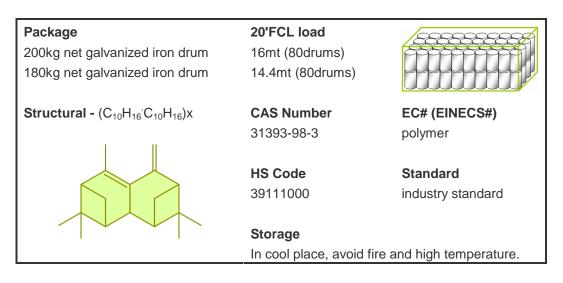

Property & Usage

SumTac[™] Polyterpene Resin is a pale, inert, low molecular weight resin, which is made from polymerization of pinene. It's well compatible with rubber, SIS, SBS and EVA for its good coldness resistance and easy emulsifying, and it's stable against oxygen, heat, light, radiation and crystallizing. It dissolves in turpentine, benzene, toluene, gasoline but not in water, methanol and alcohol.

Usage in film coating adhesive, protective film and hot-melt adhesive.

Technical Data Sheet (TDS-9200)

HYDROCARBON RESIN

Property & Usage

SumTac™ Hydrocarbon Resin is made from petroleum based fractions including aliphatic (C5), aromatic (C9) & DCPD (dicyclopentadiene), or mixtures of these (copolymer). There are two basic categories of hydrocarbon tackifier resins and also name as petroleum resin.

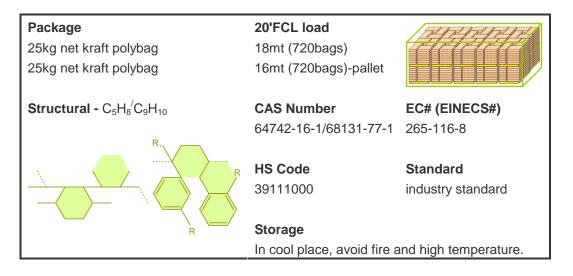

C5 is so named because they are generally polymers of monomers with five carbons. Basic C5 aliphatic resins have Gardner colors between 2 and 7 (from light yellow to light brown) and are mostly used to tackify aliphatic polymers, especially natural rubber, EVA, SIS and APO. It's used mainly in rubber, tyre, road marking paint, hot-melt & PSA adhesive, etc.

C9 is so named because they are generally polymers of nine-carbon aromatic monomers. It's based on aromatic fractions that undergo very little refining prior to the polymerization of the resin. It's typical Gardner color from 7 to 12 (dark yellow to dark brown). It's used mainly in EVA-based adhesives, contact adhesive for footwear, printing inks, sealants, and paints.

C5/C9 copolymer is mixture of C5 & C9 resin and suitable for rubber & radial tyre.

Technical Data Sheet (TDS-9300)

RESIN DISPERSION

Property & Usage

SumTac[™] Rosin & Resin Dispersion is a kind of rich-solid-content water-borne emulsion, made from gum rosin, rosin derivatives or petroleum resin together with macromolecule surface active agent via emulsification of EIP method. It's a green and environment-friendly water-based emulsion with apparent tackifying performance and extensive compatibility. It's compatible with acrylate, VAE, SBR, CR, NBR, NR and EVA copolymer and suitable for non-solvent-type adhesives & tackifiers. Most of its average grain-size is up to 200nm (0.2*u*m).

Usage mainly in PSA adhesive like tapes & labels (high tack & peel, good UV & aging stability, anti-low temperature, etc.), tectorial adhesive, static floss-weaving adhesive and white latex and many other coating materials for construction. It is with superior thermo-resistance bonding ability, superior transparency and better bonding effect with alkyl dilution.

STYRENATED TERPENE RESIN

Property & Usage

SumTac[™] Styrenated-terpene Resin is a light color, low odor, and heat stable modified terpene resin, made from turpentine and styrene, with polymerized by mandrax-Clinton (Friedel-Crafts) and then proceeded via hydrolysis, washing, filtering and distillation.

This light colored, low odor resin is the right choice for premium hot melt adhesive applications. The aliphatic-aromatic nature of these resins gives them excellent adhesion to a range of substrates including polyolefins. Styrenated terpenes are highly compatible in EVA (Ethylene co-terpolymers: EVA, EMA) and SBC (Styrene block copolymers: SIS, SBS, SEBS) systems and easily solved in all kinds of elastomeric polymer like styrene-butadiene block copolymer, natural rubber and styrene-butadiene rubber.

Usage for assembly and packaging, non-woven, bookbinding and pressure sensitive adhesives for tape, label and decal applications. Provides a very good balance of properties when compounded with styrenic block copolymers or ethylene vinyl acetate copolymers. As a kind of pale and white tackifier, also widely used in top grade adhesive, coatings, print inks and rubber, children & woven health daily-uses, etc.

Structural-macromolecule polymer n/a	CAS Number n/a	EC# (EINECS#) polymer
	HS Code 39111000	Standard industry standard
	Storage In cool place, avoid fire	and high temperature.

PINE TAR OIL

Property & Usage

SumTac[™] Pine Tar Oil is a botanical product with special odor obtained from the destructive distillation of pine wood or stump. It is a complicate mixture of kinds of phenols, fatty acids, volatile oils, terpenoid, etc. and has particular chemical characters.

Usage as efficient softening solvent in rubber & tyre industry, as preservative in wooden or other construction & medicine, as water-proof agent in paint & coating application, etc. and also used in pitch industry & mineral flotation.

Technical Data Sheet (TDS-9600)

PINE TAR OIL	EXPORT GRADE
Appearance & color	deep brown & viscous liquid
Viscosity S (100ml, 85 deg C)	150-250, 250-350, 350-450
Volatile content	6.5%, 6.0%, 5.5%
Specific gravity (D20/4)	0.96 - 1.06
Moisture content	0.5% max
Ash content	0.5% max
Mechanical Impurity content	0.3% max

Package	20'FCL load	20'FCL palletized			
200kg net galvanized iron drum	16mt (80drums)	16mt (80drums)			
25kg net carton	21mt (840cartons)	18mt (720cartons)			
HS CODE	CAS Number	EC# (EINECS)			
38070000	8011-48-1/91995-59-4	232-374-8/295-321-8			
UN No.	Storage (Flash Point 70-170 deg C)				
1993	In cool place, avoid fire and high temperature.				

PHENOLIC RESIN

Property & Usage

SumTac[™] Phenolic Resin is an octyl-phenol heat reactive resin for ink intermediate and rubber curing applications and it may be brominated for better performance. It has an active hydroxymethyl group and soluble in aromatic hydrocarbon & organic solvents like toluene, xylene, acetone, ether, ethyl acetate, gasoline, kerosene, turpentine, etc. It's also known as vulcanization agent resin (vulcanizator).

Usage as vulcanization resin / rubber curing agent in rubber production like butyl rubber (IIR), nitrile butadiene rubber (NBR), styrene butadiene rubber (SBR), neoprene/chloroprene rubber (CR) & natural rubber (NR), tyres, sealants, conveyer belts, inks, adhesives, etc.

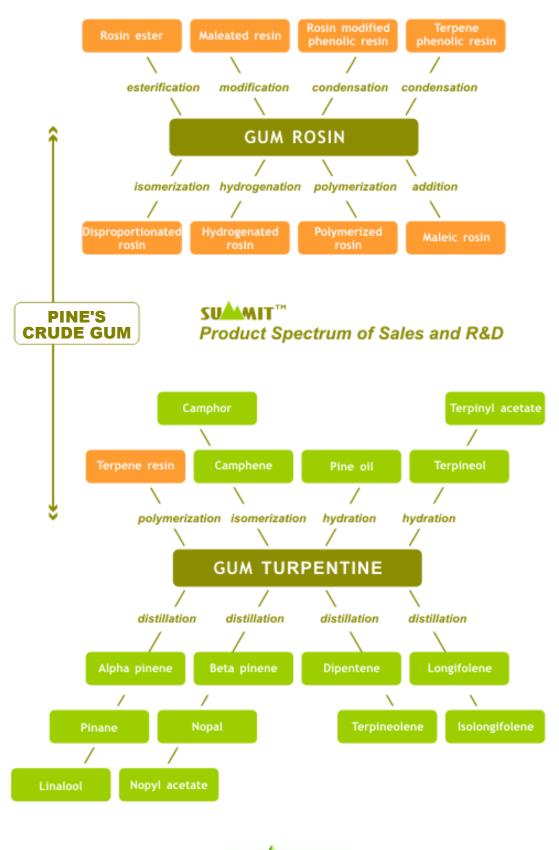

Technical Data Sheet (TDS-9700)

PHENOLIC RESIN	PH45	PH55	PH56
Appearance	yellowish- greenish transparent	yellow to red-brown transparent	yellow to red-brown transparent
	pieces	pieces	pieces
Softening point (R&B, deg C)	80 - 95	80 - 95	80 - 90
Hydroxymethylate content	8% - 13%	8% - 12%	8% - 12%
Specific gravity (25 deg C)	1.04 about	1.05 about	1.04 about
Bromine content	-	3.8% - 5.2%	6.0 - 7.5%
Equivalent to Schenectady (SII)	SP-1045	SP-1055	SP-1056
Insoluble matter in acetone, max.	1.5% max.	1.5% max.	1.5% max.
Water content, max.	-	1%	1%

Package	20'FCL load	20'FCL palletized
25kg net in kraft/plastic woven bag	15mt (600bags)	14mt (560bags)
HS CODE	CAS Number	EC# (EINECS)
39094000	unspecified	unspecified
Structural macromolecule polymer	Storage In cool place, avoid fire	e and high temperature.
