

ALPHA TERPINEOL

Property & Usage

SumFlu™ Alpha terpineol is a kind of terpene alcohol of mixed of isomeric terpineol, obtained by dehydration of terpine hydrate. It is composed predominantly of alpha terpineol, which is the only fragrant substance in the isomers, with lesser amounts of gamma, beta and delta terpineol. At normal temperatures, it is a water white, oily liquid or crystalline with a pleasant floral odor. Its excellent solvency and surface active properties accounts for its usefulness to many fields and industry.

Usage in the manufacturing disinfectants, household and industrial soaps, detergents, cleaners and other chemical specialties.

Technical Data Sheet

ALPHA TERPINEOL	98%
Appearance	colorless thick liquid or white crystalline matter material
Dioptre (20 deg C)	1.4800 - 1.4860
Specific gravity (20 deg C)	0.930 - 0.936
Moisture	0.6% max.
Tertiary alcohols content (GC)	98% min.
Typical value:	
Alpha + gamma terpineol content	85%
Alpha terpineol content	75%
Gamma terpineol content	10%

Package & Note

Package	20'FCL load	20'FCL palletized
185kg net galvanized iron drum	14.8mt (80drums)	14.8mt (80drums)
Chemical Formula	CAS Number	HS CODE
C ₁₀ H ₁₈ O	10482-56-1	29061910
Standard	Storage	
industry standard	In cool place, avoid fire and high temperature.
